## SUGGESTIONS FOR USING CIRCULATION RECORD BOOK

This Circulation Record Book meets the needs of Public, School, College, and University Libraries. The following suggestions are made for adapting the book to the requirements of each:

### PUBLIC LIBRARIES:

In order that there may be no confusion of adult and juvenile statistics, they should be kept on separate pages and the word "Adult" or "Juvenile" prefixed before the heading "Circulation Statistics."

### SCHOOL LIBRARIES:

In school libraries which keep both grade and high school circulation records, separate pages should be used for the statistics of each, and the word "Grade" or "High School" prefixed before the heading "Circulation Statistics."

### COLLEGE AND UNIVERSITY LIBRARIES:

College and university libraries, which keep separate records by class of the overnight and of the general circulation, should use a different page for each. The appropriate word "overnight" or "general" should be written at the top of the page before the heading "Circulation Statistics."

### COLUMNS WITHOUT PRINTED HEADINGS:

Under "OTHER MATERIAL" may be included such headings as maps, slides, film strips, manuscripts, microfilms, microcards, etc.

Under "Other Statistics" may be included such headings as Attendance, Fines (or Receipts and Payments), Books added, Books discarded, Books mended, Books sent to bindery, Gifts received, Overdue notices mailed, etc.

School libraries may prefer to use the entire space for the recording of attendance by period or hour.

### SUMMARIES:

Space has been left for summaries by months, so that in a public library adult and juvenile summaries may be kept separately, or in school libraries, grade and high school summaries may be kept separately.

The names of the months have been omitted in order that libraries may insert them in the order of the fiscal or academic year.

The space at the bottom of one summary page has been left without printed headings; it may be used for yearly summaries of book circulation or for summaries of other statistics.
